

International Address Cleaning

Pricing and Billing Information

1. Prices

All prices quote in EUR apply to Germany exclusive of VAT. For countries which are members of the European Monetary Union, VAT will be waived if a correct VAT ID can be provided. For all other countries and prices quoted in CHF, VAT does not apply since the service is a cross-border on.

1.1 Standard Pre-Paid (IAC Excel / IAC Online)

You pay a fixed amount, in line with the number of requested transactions, in advance.

You are free to determine the timing of the transactions purchased in the 12 months following the placement of your order.

Number of transactions	Prices	
	CHF	EUR
1'000	150	100
2'500	225	150
5'000	375	250
10'000	600	400
50'000	2'400	1'600
100'000	4'500	3'000
200'000	7'500	5'000

Number of deduplication transactions	Prices	
	CHF	EUR
10'000	90	60
50'000	450	300
100'000	825	550
200'000	1'650	1'100

Prices refer to the number of addresses submitted (inout), regardless of many addresses actually required correction. Please note that both address correction and deduplication are considered as separately chargeable processes and are thus charged accordingly.

1.2 Special Offers

If you would like to process more than 100'000 addresses per year, as a single batch or broken down into smaller batches, we would be only too happy to provide you with a tailor-made quote.

2. Billing

2.1 Standard Pre-Paid (for IAC Online and IAC Excel)

You make a single payment in advance, which can be drawn upon in the 12 months following placement of your order. This service can also be paid for against invoice. Customers in Switzerland are billed in CHF and customers outside Switzerland in EUR. Customers in Switzerland should therefore transfer the relevant amount to a Swiss account and all other customers will be asked to transfer the amount to an account in Germany. In addition, the pre-paid service can also be paid for by credit card and, in Germany, by debit card. Bills are issued in EUR only.
