

# VinoLog: Making sure every bottle arrives safe and sound

You sell wines or spirits and deliver to private individuals all over Switzerland? Then let Swiss Post take care of the handling and door-to-door service: we pick up your consignments and deliver them to your customers. We also take care of packaging operations and returns. This means you can devote all your attention to the wine-making and tasting, buying and selling.

### Simpler than drawing a cork!

We pick up your VinoLog consignments, or you can bring them to one of our depots in your region. The wine will be delivered to your customers in the next two to four working days. On request, it can even be delivered straight to their cellar.

### Shipment of goods direct to intermediaries with VinoLog

You need to get bulky shipments of wine in palletized form to your partners with no worries? Let us take care of it. Following your instructions, our driver will pick up your shipments from the stated address on the same or next day, having first checked that they are complete. What does that leave you to do? Nothing, apart from sending us the delivery form which you will find at [www.swisspost.ch/transport](http://www.swisspost.ch/transport).
