

Logistik-Services Safety Policy

Vision

- As a leading logistics company, Logistik-Services sees itself as a provider of trustworthy, comprehensive, end-to-end logistics services in Switzerland as well as in import and export.
- As a responsible and dependable employer and partner, Logistik-Services attaches the highest priority to safety, both with regard to staff and the logistics services it provides.

Mission statement

- By regularly assessing identified and potential new hazards, and taking appropriate action based on these assessments, Logistik-Services reduces the risks to life and limb of staff, customers and suppliers.
- With appropriate safety precautions, Logistik-Services makes an important contribution to establishing credibility, trust, professionalism and commitment.
- Logistik-Services ensures the safety of the goods entrusted into its care by observing and complying with the legal requirements and the relevant standards and guidelines.
- Recognising that our personnel are our most important asset in the fulfilment of services, Logistik-Services is firmly committed to their safety and training.

Safety objectives

- Logistik-Services protects persons, clients, suppliers, operations and both its own tangible and intangible assets and those entrusted to it, with appropriate, suitable measures.
- Processes and work equipment are constantly adapted to the prevailing safety situation and to changes in the internal and external conditions.
- Safeguarding of the range of services, the operational continuity of the infrastructure and the associated universal supply of Switzerland in the letter and parcel sector.
- Creation of a safe working environment for Logistik-Services staff.

Requirements / General conditions

- Legal requirements, agreements with customers and suppliers as well as internal guidelines must be taken into account when implementing the safety measures.
- The Logistik-Services Safety & Security Department is responsible for ensuring that the company's safety officers are capable of fulfilling their safety-related responsibilities completely and in accordance with the latest technological standards and the defined procedure.
- Anchoring of safety through specification documents, consultation and training.
- The provision of the financial resources required for safety is included in the budget on an equal footing with other operational resources.
