

## Energy surcharge for domestic parcel services

The average prices of diesel, petrol and electricity in 2021 as per the National Consumer Price Index (CPI) are the basis of the price index (=100%). The new average prices as per the National CPI are fixed each month and used to calculate the price index vis-à-vis the base. The resulting price index that is calculated is then multiplied by the "Energy mix for the vehicle operations for parcel and letter delivery in the Logistics Services unit". This results in the total energy cost index (marked in blue), which determines the surcharge that is valid at the present time.

### Base

Average prices in CHF according to the National CPI			
Year	Diesel (per litre)	Unleaded 95 (per litre)	Electricity (consumption type VI per kWh)
2021	1.74	1.67	0.1746

### Calculation of the Swiss Post energy cost index

Average prices in CHF according to the National CPI					Price index compared to the base (year 2021)			Energy mix for vehicle operations*			Energy cost index				Surcharge	
Year	Month	Diesel (per litre)	Unleaded 95 (per litre)	Electricity (consumption type VI per kWh)	Diesel	Unleaded 95	Electricity	Diesel	Unleaded 95	Electricity	Diesel	Unleaded 95	Electricity	= Swiss Post energy cost index	Surcharge derived from Swiss Post energy cost index (excl. VAT)	Valid for parcel consignments in the following month
2022	December	2.09	1.79	0.1802	120.1%	107.2%	103.2%				103.5	11.3	3.4	<b>118.2</b>	CHF 0.06	January 2023

### Surcharge table

Swiss Post energy cost index	Surcharge (excl. VAT)
up to 105	CHF 0.00
105.1 - 110	CHF 0.02
110.1 - 115	CHF 0.04
115.1 - 120	CHF 0.06
120.1 - 125	CHF 0.08
125.1 - 130	CHF 0.10
130.1 - 135	CHF 0.12
135.1 - 140	CHF 0.14
140.1 - 145	CHF 0.16
145.1 - 150	CHF 0.18
150.1 - 155	CHF 0.20
...	further CHF 0.02 surcharge for each additional 5 index points

see page 26 "Measures for the shift to renewable energy"

\* For the years 2021 and 2022, the energy mix data was collected for the Logistics Services unit in general. In 2023, the basis for calculating the energy mix was improved, meaning that, from 2023 onwards, it was possible to expressly collect and show the energy mix for the vehicle operations for parcel and letter delivery.
