

Four letters for security

Bechtle Management AG relies on IncaMail

Sending sensitive data by mail also needs to be as trustworthy as Bechtle. This is one reason for using IncaMail here. The name guarantees high values: integrity, non-repudiability, confidentiality and authentication (Inca) give a promise to which Bechtle and also Swiss Post attach high value.

Security – today and tomorrow

Who should show the way into the future if not qualified experts? The certified secure mail solution from Swiss Post is a good match for the system integrator and e-commerce provider which is one of the biggest companies in its sector in Switzerland and also throughout Europe. But above all it fits in well with the dynamic history and visionary future of the company whose canon of values is characterised by high requirements in terms of security, reliability and success. Since profit and growth are not the only factors decisive for success, a special bundle of characteristics rounds off the ambitious Bechtle goals: competence, trustworthiness and integrity are very high up on the list of priorities when it comes to part-

nerships with customers and suppliers – a principle which was also the inspiration behind the decision to choose IncaMail, the product from Swiss Post.

Adapted to the spirit of the time

With IncaMail, the platform for secure and verifiable electronic data exchange from Swiss Post, Bechtle Management AG is remaining true to its goals – and is also acting as an example at the same time by adapting to the spirit of the time and by increasing efficiency. Even the saved resources are not only to save costs, they also serve the purpose of sustainability. This is because in the area of human resources wage documents are sent paper-free via IncaMail.

Cooperation among the best

Itself accustomed to professional IT projects, Bechtle was looking for the best cooperation partner as well as the best tool for secure digital dispatch. Swiss Post Solutions was suitable for both reasons, and there was a third reason too: major investments were not needed because IncaMail is a good addition to the human resources software of ABACUS. Since it was integrated in its HR system, wage accounting has worked at the push of a button – and shortly afterwards an e-mail with a PDF arrives to the delight of the employees. To make sure the sensitive message remains confidential, Swiss Post ensures that the powerful encryption technology works perfectly.

From vision to reality

There are only advantages with the fully-electronic alternative to physical letters – huge time savings when processing wage documents, less work required for sending and one step from a vision to the reality of the paper-free office. Even the employees find the modern digital dispatch “cool” – not least because there is the IncaMail app for this.

Patented security

- Fully operational: IncaMail can be integrated easily in existing infrastructures, systems and business software.
- Straightforward: the integration in the ABACUS HR system enables direct and smooth dispatch of sensitive documents via IncaMail.
- Money-saving: the security platform can be installed simply and without any additional training required.
- Verifiable: IncaMail sends confidential data quickly – with confirmation of delivery.
- Practical: IncaMail enables dispatch to all recipients – with only one e-mail account.
- Efficient: IncaMail is also suitable for all kinds of confidential e-mail communication – not only with IT specialists.
- Reliable: with the patented SAFE technology IncaMail provides maximum security.

A system with many abilities

- Adaptable: there is a choice for the IncaMail service – it can be provided either directly from the infrastructure or via the Internet.
- Time-saving: IncaMail shortens the wage processing procedure by one or two days.
- More flexibility: changes at short notice in wage processing can be taken into consideration better today.
- Efficient: IncaMail lowers costs.
- Uncomplicated: the integration of IncaMail was unproblematic – apart from some internal firewall configurations.
- Verifiably secure: messages sent with IncaMail cannot be read by third parties – and cannot be manipulated either.
- Sustainable: much less paper and toner are used, so this helps the environment.
- Modern mobility: employees can receive and read IncaMail at any time and from any location.
- Progressive: the functions of IncaMail are constantly being improved – such as the simplified search via the logbook export.

Bechtle Schweiz AG

With 12 locations and around 800 employees, Bechtle is one of the biggest system integrators and e-commerce providers in Switzerland. The company is part of the German Bechtle Group, founded in 1983, which – with a total of around 5,800 employees, more than 60 IT system houses in the D-A-CH region and trading companies in 14 countries throughout Europe – is one of the leading IT/e-commerce providers. Bechtle provides more than 75,000 customers from industry, trade, public service and finance with a complete offer – extending comprehensively across different manufacturers – for IT infrastructure and operation from a single source. The high-selling company is listed on the technology index TecDAX.
