

Explanation of the list

Please note that the order values are each **inclusive of VAT**, but the **order value excluding VAT is relevant for calculating the applicable threshold**.

The list also includes the procurements published at www.simap.ch.

Swiss Post publishes all contracts that were concluded in 2022 here, regardless of the specific contract or service start date. The latter can therefore only start at a later date (2023).

The procedure type "direct procedure" also includes orders which have been awarded in the course of a request for proposal from several providers and therefore in competition.

In the event of contradictions, the German version shall prevail.

SECO procurement reporting 2022

subject of procurement (category)	procedure in accordance with the PPA/PPO	Contract start date	Contract end date incl. extension options	Order value including VAT and any options	Supplier (contractor)
